Certified for Microsoft Dynamics NAV 2016

Digital Vantage Point has met Microsoft's highest standards for partner-developed software solutions.

Certified for

Microsoft Dynamics

NAV

Toronto, CANADA - Digital Vantage Point is proud to announce that Nav-to-Net™, an integrated e-Commerce solution for NAV, is now Certified for Microsoft Dynamics NAV 2016. By successfully meeting all certification requirements put forth by Microsoft, Nav-to-Net™ can now carry the distinct Certified for Microsoft Dynamics logo. Digital Vantage Point has consistently received CfMD accreditation for almost 10 years.

Solutions that are Certified for Microsoft Dynamics have demonstrated development quality and compatibility with the Microsoft Dynamics product on which it runs by passing rigorous VeriTest software solution testing for Microsoft Dynamics and are profiled in the Microsoft Partner Solution Profiler tool. In addition, the Microsoft Dynamics partner must have customers who are successfully using the certified solution and are willing to recommend it, be enrolled in a Partner Service Plan with Microsoft, and be a Gold Certified Partner in the Microsoft Partner Program.

For customers, this accreditation helps them identify solutions that have been tested for compatibility, meet high quality standards, and are successfully used by existing customers. This certification represents a significant step in elevating the standard for partner-developed software solutions for industry-specific business applications. By highlighting these solutions, Microsoft also creates new opportunities for partners to expand their reseller channel and to better promote their packaged Microsoft Dynamics solution for customers.

By requiring both the software solution and the partner to meet our highest standards, Microsoft is assuring customers that these certified solutions work with their investments in Microsoft Dynamics. Microsoft congratulates Digital Vantage Point on achieving the Certified for Microsoft Dynamics status for Nav-to-Net™ by demonstrating its success and commitment in delivering a leading Microsoft Dynamics solution.

Nav-to-Net™ e-Commerce is built right in Microsoft Dynamics NAV and helps customers realize their true business potential with seamless integration. This versatile and developer-friendly solution is feature-rich to make it adaptable to any B2B, B2C, and B2E environment.

Digital Vantage Point provides implementation, training, and consultation for small, midsize and corporate businesses using business enterprise applications. Digital Vantage Point specializes in Microsoft Dynamics NAV to develop and deploy their Nav-to-Net™ e-Commerce solutions that help leading global companies across multiple industries. This includes reducing training and maintenance costs, getting to market faster, and achieving continued success in their e-Commerce.

About Microsoft Dynamics

Microsoft Dynamics is a line of financial, customer-relationship and supply-chain management solutions that helps businesses work more effectively. Delivered through a network of channel partners providing specialized services, these integrated, adaptable business management solutions work like and with familiar Microsoft software to streamline processes across an entire business.
